

PREPARING AND UPLOADING TRACKS

NEXT STEPS

Preparing

To help us create the best possible masters, please check the following before uploading: 

- Make sure no individual tracks or channels are clipping (don't go into the red).
- Avoid using compression, EQ, or effects on the master bus.
- Leave at least 6dB of headroom on the master bus.
- Add 1-2 seconds of lead-in and lead-out at the start and end of each track.
- Bounce to stereo, 24-bit WAV files at your project's native sample rate (44.1, 48, 96, or 192kHz).
- Double-check the bounced files to make sure they're correct and error-free.

Uploading

Once your tracks are ready, upload them via our WeTransfer portal: tonalex.wetransfer.com

Next Steps

Once you've uploaded your tracks, email us at info@tonalex.co.uk or use the contact form on our website. Be sure to include all the following details so we can deliver the best service: 

- The services you require (mastering, sequencing, DDP creation)
- Any alternative versions you require (vinyl, high resolution, instrumentals, etc.)
- The number of tracks and the track order
- Track names, artist name, album name, ISRCs, EAN/UPC codes, reference tracks, etc.

This ensures we're fully prepared to meet your needs. We'll confirm your submission, provide our lead times, and answer any questions.
